29 Dec – Get underway [at 0919 for machinery trials and dependents cruise per DL. 1339 Moored at Long Beach pier 15 per DL]. – per DPD.

**NOTE 1:** Prior to Mar 62, COLLETT deployed as part of USS Bennington ASW Group & changed home port to Yokosuka, Japan – per Art Horsch.

**NOTE 2:** Per Chuck Kiesling in 2010, there were 122 shipmates on board for the entire year of 1961, however, per the PD, 460 shipmates served for some time during the year.

**NOTE 3** Per Bill Brooks in Aug 2010: In 1961 we went to Seattle to participate in the Sea Fair. I remember seeing the Space Needle under construction.

\* Also in Aug 10, Al Wapstra added: It had to be 1961 because we were underway after bow replacement to Seattle for Sea Fair. [Per Internet websites in Aug 10, the Seattle Sea Fair is traditionally held the first week of August.]

**NOTE 4:** Sub Incident #1 – Per Al Wapstra in Aug 10: In 1961 [31 Aug 1962 per Bob Kitt], we were off the coast of Southern California during night ops with a San Diego based sub. The skipper [Bob Kitt] ordered us to have our 5-inch gun barrels on Mounts 51, 52 and 53 sticking straight up to look like a civilian steamer. We ran some bed sheets from main mast to the forward railings on the signal bridge to break our DD profile. I helped with the bed sheet work. We thought it was pretty funny, but it sure did fool that sub skipper. We also went to one screw and steaming at low speed.

\* Also in Aug 10, Bill Brooks added: Wapstra has described the exercise with the sub where we were proactive and tried to confuse the sub. It was a day-long exercise with the USS RONQUIL (SS-396). We did a number of things to try to convince the sub we were not a destroyer for us to get close enough for a simulated attack.

\* Also in Aug 10, Bob Kitt provided a copy of the letter dated 31 Aug 1961 from the skipper of the RONQUIL for our usscollett.com website. Bob also added: I offered this exercise as a game to the wardroom officers and asked their comments. They liked it and we had another discussion in the mess decks with many of the crew. The exercise was for us to transit a corridor while the sub was to try to detect us and to fire a green flare if they got a torpedo solution on us. The ideas presented included using bed sheets to give the appearance of a sailing ship. Our lights were deliberately altered to white over red (fishing ahead, red over white, pilot in sight—an old saying). The engineers offered using the idea of using a single screw instead of a DD's double screws plus banging on a frame so it would sound like a commercial type of propulsion. There were other ideas that I can't recall now, but the short of it was that we made the transit without being detected. The sub skipper said they did sight us, but didn't connect it with the disguised configuration. That's what a wacky skipper and a fun crew can do to lighten up the usual daily and expected routine.

\* Also in Aug 10, Ray Guerra added: The Chief Boatswain's Mate had us looking for rolls of six-thread twine to tie the sheets. At night, I had the mid watch & it looked strange from the bridge to see these sails flapping in the breeze. I can't remember who was on the helm, but I do remember him saying it was difficult steering on one screw. I think we did something with the aircraft warning lights too.

**NOTE 5:** Sub Incident #2 – Per Bill Brooks in Aug 2010: We were working as a target for a submarine [the USS RONQUIL on 31 Aug 1961 per Bob Kitt]. I was on the bridge at the time. We were zigzagging at slow speed for the Sub's junior officer practice when we ran over the sub or the sub hit us. For a while we thought we sunk it because we could not contact it on UQC [an underwater communications device]. After several harrowing minutes, the sub surfaced with its periscope bent back on a 45 degree angle. We then went back into drydock to replace our new sonar dome. The crew was really concerned about the ship being known as "Colliding Collett."

\* Also in Aug 10, Mike Henry added: When the conning officer [of the sub] put the attack scope up, the C.O. made a safety check with the search scope, saw nothing but grey, realized it was a ship and made an emergency dive. [Meanwhile,] an alert lookout [onboard COLLETT], BM3 Hoover, sighted the periscope when it broke the surface and announced it in a loud voice (for which he was famous). "Where away?" replied the OOD. "Right there" bellowed Hoover as he leaned over the bridge wing and pointed straight down. As part of the emergency dive procedure, the sub flooded all available ballast tanks which generated a huge bubble that made us fear we had ruptured the pressure hull. It took a while for the sub to level off from the dive and come to the surface.

\* Also in Aug 2010, Bob Kitt added: This incident occurred during an exercise on the return part of the corridor. COLLETT was on a scheduled zigzag plan according to the exercise plan and the sub was to make a submerged attack to train their crew on simulated torpedo approaches and torpedo solutions. They were making their first run and evidently misjudged our zigzag course so that our new course and their solution put us on top of them. The sub's periscope surfaced about 30 yards bearing about 15 degrees off our starboard bow. We were proceeding at 15 knots on scheduled courses. It was too late to take any evasive action--and under the rules, we were to maintain our course and speed regardless of the sub's actions. The sub made an emergency dive, but our sonar dome was hit and dished in the top front of their conning tower and bent their extended periscope. Our calls on the underwater phone went unanswered until the sub had leveled off at about their maximum allowed depth. It was quite a sickening feeling for all of us for about eight minutes before hearing from the sub that they had leveled off and were surfacing. And what a relief it was to see it pop to the surface. Our keel mounted sonar was smashed beyond repair. At any rate, all that happened was that the sub went into San Diego's submarine dry-dock and was repaired; while COLLETT went into Long Beach and received a new sonar.

**NOTE 6:** Sub Incident #3 – Per Ray Guerra in Aug 10: I remember the Captain using a similar tactic off of San Pedro. He hid among some fishing boats running on one screw and then came rushing out when the sub was slowly snooping around on the surface. I remember the sonar was on the speakers and made some direct contact sounds going from ping, ping, ping, to ping pong as the sub dove. If I remember correctly, we fired some practice hedge hogs and got some hits.

**NOTE 7:** Mount 53 Incident – The following description is based on the recollection of several shipmates including William Brooks, Michael Henry, Albert Hartzog, & Bill Turner. Prior to the ship changing home ports from Long Beach to Yokosuka, Japan in January 1962, a number of personnel changes took place. Michael Henry recalls that the mount captain during the incident was GM2 Wayt Whitesell. During a gunnery exercise, the gun was loaded and while it was being elevated, a shipmate slipped into the pit below the gun. Whitesell observed this and immediately closed the cease fire and brake switches, freezing everything in the mount and he had everyone freeze where they were. He then depressed the barrel of the gun to gain access to the shipmate. The corpsman was called and the shipmate was removed from the pit. Bill Turner, the powderman, identified the injured shipmate, the projectileman, as Al Hartzog. Al confirmed that he was the injured shipmate; he was badly frightened as were the other crewmen in the mount. Al said his leg was broken in 14 places and he lost 6 pounds of flesh in incident. He was taken off the ship by a small helo in a wire basket after being given 2 shots of morphine. Al was treated for his injuries in the San Diego Naval Hospital. Based on a USN Personnel Diary, on May 18; Al Hartzog was sent for treatment to the Navy

Hospital at San Diego, so the incident must have occurred on or shortly before 18 May. We believe that Wayt Whitesell died in 1971.

## 1961 USS COLLETT Shipmates

The following list includes information from USN Personnel Diaries & other publicly available sources. In Mar 2014, the entry for David Faust, SOGSN, was removed from the list after a conversation with David because he was temporarily onboard from his ship the USS MANSFIELD.

Entries marked with (d) are known (or strongly suspected) to be deceased; such entries have not been updated since 2020. Names marked with (?) are suspected of being misspelled. The rate or rank given for a shipmate is highest he attained while onboard.

To learn more (or offer a correction) about an entry, e-mail [olderr730@yahoo.com](mailto:olderr730@yahoo.com). To protect the privacy of shipmates, they will be told of your enquiry but will choose if they wish to respond directly to you.
